Technical Consultant – Huron Education

ABOUT HURON:

Huron Consulting Group stands out as one of the fastest growing financial and operational consulting firms in the industry, serving clients in the healthcare, education, legal, life sciences, and business advisory sectors. Huron helps clients improve performance and transform their enterprise by reducing costs, utilizing technology, and simulating growth. Our professionals employ their expertise in finance, operations, strategy, and technology to provide our clients with specialized analyses and customized solutions that are tailored to address each client's particular challenges and opportunities to deliver sustainable and measurable results.

Huron's entrepreneurial spirit is captured in our values-based culture. Our Product Specialists operate under a set of shared values: Integrity, Pursuit of Excellence, Accountability, Collaboration, and Passion. As one of the most trusted and respected healthcare consulting firms, we hold ourselves to the highest professional standards and consistently deliver excellence. Simply, it's an unwavering commitment to always do the right thing by our clients, teams, shareholders, and communities. We encourage our teams to reach out and share their time, through initiatives like Huron Helping Hands. Our team members apply their enthusiasm and skills not only to their client work, but also to their personal causes and interests. When you join Huron, you are part of a **unique culture**.

ABOUT THE PRACTICE:

Click Commerce, part of the **Higher Education & Life Sciences Practice** of Huron Consulting Group, focuses on software solutions for research administration and compliance. Click has a track record of successfully implementing grant management and regulatory compliance projects of significant scale and complexity at leading research institutions, academic medical centers and hospitals. Our eResearch Portal is designed to unify multiple research-related business processes into an integrated, comprehensive electronic solution. They are a leader in large-scale deployments with a client list that includes many of the largest National Institutes of Health (NIH)-funded research institutions.

ABOUT THE ROLE:

As a **Technical Consultant Engineer** you are a member of the Professional Services group responsible for leveraging your technology skills in the configuration and deployment of client applications. In the Technical Consultant Engineering role you will design web-based applications based on the Click Research Portal and will partner with clients to leverage the latest industry and technology best practices. Development will include business logic programming, UI/forms/reports design, workflow design and configuration, and other design and implementation driven by customer specific requirements. This role also participates in the definition and development of the requirements and detailed design for the customer-specific application and therefore will be involved in customer

interactions. When you join Huron, you **leverage technology to solve business problems**. We look for candidates who have the ability to:

- Work closely with project and account management to develop a clear definition of requirements and function required by the client
- Design, implement, and/or configure customer-specific requirements and functions in the context of Click Research and Healthcare Extranet application suite
- Document requirements, design, and implementation as required
- Ensure quality through thorough testing
- Interact and work closely with Customer Services to deliver follow-on consultancy and services as required, provide technical help/consulting on customer support calls and to help ensure customer satisfaction
- Interact and work closely with Product Development Team toward objectives of:
 - Ensuring design and implementation choices are consistent with best practices and use of the Click Extranet technology
 - Providing feedback and direction to Development on product improvement and extension
 - Creating function that is reusable and leverageable in the product or in other deployment projects
- Operate within a complex product and business environment requiring the ability to deal with multiple requests. Able to work independently and maintain focus on priority tasks.

BASIC ROLE REQUIREMENTS:

- Bachelor's degree or equivalent with a focus in computer science systems is preferred. Relevant computer-related degrees and/or equivalent programming/development experience are also accepted.
- Hands-on web application development/programming with experience in or using:
 - Database technology and SQL/query design, preferably using Microsoft SQL Server.
 - HTML and XML
 - Programming (JavaScript, VBScript, C++ or C#, Java, VB)
 - Source code control technology and process; preferably using VSS
 - Microsoft Windows; preferably Server
- Passion for problem solving and strong analytical skills
- Excellent communication and teamwork skills
- Proficient experience with Microsoft environment and tools; include MS Word, MS Excel, and MS Outlook
- Willingness to be based out of Portland, Oregon or Chicago, Illinois
